

GRAND CALM™

**Helps to Minimize Stress...
and Support Maximum Performance**

Riding and preparing your horse for a casual trail ride, exercise and training, or participating in a show should be fun for you and your horse. A hard to handle, spooky, stressed out horse will quickly ruin your enjoyment and affect the outcome of your ride or performance.

Grand Calm is a unique calming supplement that is drug free and non-herbal. The formula contains 4 different sources of magnesium that provides maximum bioavailability which broaden the effects of the magnesium. The formula also includes the amino acid Theanine which is well documented as an effective aid to relaxation. Grand Calm will help control high anxiety in horses that are tense, spooky and inattentive.

All ingredients are exempt from any FEI restrictions.

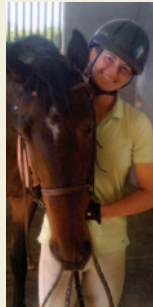

- Over 6,000 mg of Magnesium
- 4 sources of Magnesium
- 1,000 mg Theanine
- 500 mg Thiamine
- 1oz serving
- Pelleted and Palatable

**Calming Formula
for horses that are:**

- Nervous
- Inattentive
- Spooky

"In the time I tested Grand Calm I could see a huge difference in the way my horse could focus her energy into her jumping instead of being high strung and unable to pay attention to her job. With Grand Calm my mare is now a lovely and willing partner who no longer rushes at fences and can stand still without tossing her head."
